

Legacy Known Issues Updated on 9/17/2018 | Page 1

The Legacy Known Issues List provides up-to-date information on current issues related to the MMIS that are impacting a significant number of providers. This document is intended to provide a concise list of current problems identified/reported in recent months. Please note that this is an informational list only. The resolution priority of an issue is not determined by whether or not it appears on this list

This document is divided into the following sections:

Known Issues – This section contains items that, where applicable, are categorized by provider or claim type. For previously known issues that have been resolved, the item and item number have been removed.

NOTE: Items updated or new items added this week will appear in bold text.

Legacy Known Issues

Currently, there are no known legacy system issues reported. Please continue to check this document frequently in the future, as more details will be coming shortly.

Item #	Provider / Claim Type	Description	Resolution/Work Around	Date Reported	Date Resolved
