Announcement 1017

Notice for Provider Type 63: Residential Treatment Center (RTC) AKA Psychiatric Residential Treatment Facility (PRTF) Regarding Discharge Medications

Per Medicaid Services Manual Chapter 400, Section 403.8(B)(7): Provider Responsibilities include that RTC's ensure upon discharge that the legal representative of the Medicaid eligible recipient be given a supply or access to current prescribed medications. Therefore when discharging a Nevada Medicaid recipient please ensure that prescriptions are written by an enrolled Nevada Medicaid provider and that an adequate supply of medications is dispensed to the recipient or legal representative or included in the written discharge prescriptions, based on the discharge appointment planning and the recipient's access to outpatient care. It is important for the recipient to maintain compliance with their current prescribed medications, and to assist in the continuity of care from RTC to outpatient care.

Reminder: To assist in the recipient's access to outpatient care, if the recipient is discharged before the last authorized date, the provider is to submit, by fax, the [Prior Authorization Data Correction Form \(FA-29\)](#) with the corrected discharge date.

Consistent with implementation of the Patient Protection and Affordable Care Act, the Centers for Medicare & Medicaid Services (CMS) requires all Ordering, Prescribing and Referring (OPR) providers to enroll in the Medicaid program in order to prescribe even if they do not submit claims to Medicaid. Please see Web Announcement 826: https://www.medicaid.nv.gov/Downloads/provider/web_announcement_826_20141030.pdf.

A link to the OPR application on the [Provider Enrollment](#) webpage is provided below:
