Announcement 1265

Revalidation Application Must Be Processed Before Provider's Termination Due Date

If you are a Medicaid provider whose revalidation application has not been processed by your termination due date, you will be ineligible to provide services to any Nevada Medicaid or Nevada Check Up recipients, including both Fee-for-Service and Managed Care Organization (MCO) enrolled recipients. You will also not have access to the Provider Web Portal the day after your termination date, which will prevent any prior authorizations (PAs) from being submitted for approval. **Please ensure that you have submitted your revalidation application to Hewlett Packard Enterprise at least 10 business days prior to your termination date to ensure that your application is processed on time.**
