Announcement 1277

Claims with ICD-10 Diagnosis Code Z80.42

Effective on claims with dates of service on or after December 20, 2016, claims that contain ICD-10 diagnosis code Z80.42 (Family history of malignant neoplasm of prostate) will no longer deny with a gender edit when the recipient is identified as a female. Providers use code Z80.42 when performing BRCA1/BRCA2 gene analysis testing for female recipients who have a family history of prostate cancer.

Claims for code Z80.42 with dates of service on or after June 1, 2016, through December 19, 2016, that denied with a gender edit will be automatically reprocessed. A future web announcement will notify providers when the claims are reprocessed.
