Web Announcement 1768

## **Nevada Medicaid Managed Care Network Provider Enrollment Requirement**

The 21st Century Cures Act requires all Medicaid Managed Care Organization (MCO) network providers to enroll with the Medicaid Program prior to enrolling with any MCO. Enrollment in Nevada Medicaid Fee-for-Service (FFS) does not require MCO network providers to accept Medicaid FFS recipients.

All providers must be enrolled in FFS and any MCO must utilize the same National Provider Identifier (NPI) type and number for all Medicaid programs. Any MCO network provider not enrolled in FFS, or enrolled in any MCO with an NPI type and number different from FFS, will be terminated from the MCO.

The Nevada Medicaid provider enrollment process ensures appropriate and consistent screening of providers and safeguards program integrity. In order to enroll in Nevada Medicaid FFS, providers will need to submit an online application at [Online Provider Enrollment](#). The Online Provider Enrollment User Manual on the [Provider Enrollment webpage](#) will guide providers through the process.

Nevada Medicaid providers who wish to continue enrollment with the MCOs may verify their Nevada Medicaid revalidation date through the following link: [Provider Revalidation Report](#). Please note, completed revalidation applications can be submitted one year in advance.

**For any questions** about enrollment, please call Nevada Medicaid at (877) 638-3472. When calling, select the prompts for "Nevada Medicaid Provider," then 0 for all other calls, and then 5 for "Provider Enrollment."
