Web Announcement 2082

Webinar Scheduled Regarding Clinical and Economic Value of Continuous Glucose Monitoring and Improved Time in Range

Dexcom® is sponsoring a free Academy of Managed Care Pharmacy (AMCP) webinar titled *The Clinical and Economic Value of Continuous Glucose Monitoring and Improved Time in Range* on February 13, 2020, at 2 p.m. Eastern Time (11 a.m. Pacific Time).

Leading diabetes experts Nicholas B. Argento, MD, and Dhiren Patel, PharmD, will discuss the following topics:

- Limitations of HbA1c for assessing glycemic control
- Relationship between Time in Range (TIR), HbA1c, and the development of microvascular complications
- The value of TIR as a tool for individual glycemic management
- Standardized Continuous Glucose Monitoring (CGM) metrics and targets for selected patient populations
- Retrospective analysis of CGM data using the Ambulatory Glucose Profile (AGP) standardized report
- Use of Dexcom G6® real-time, interoperable CGM to optimize TIR
- Health and economic benefits associated with improved TIR at the population level

Register soon. The registration webpage is live on the AMCP website at <https://www.amcp.org/calendar/clinical-and-economic-value-continuous-glucose-monitoring-and-improved-time-range>
