Web Announcement 2098

Update Regarding Claims Denied for Invalid Certified Laboratory Improvement Amendments (CLIA) Certification

Some claims have been denied with error code 4208 (CLIA license number invalid) when a valid Certified Laboratory Improvement Amendments (CLIA) certification was not on file with Nevada Medicaid for the rendering provider, but was present under the billing provider. Effective February 18, 2020, claims will be denied with error code 4208 only if neither the rendering provider nor the billing provider have a valid CLIA certification on file with Nevada Medicaid.

Claims with dates of service on or after February 1, 2019, and before February 18, 2020, that were denied in error with error code 4208 will be automatically reprocessed. Providers do not need to resubmit or appeal the denied claims. A future remittance advice message will notify providers when the claims are reprocessed.
