Web Announcement 2217

## **Age Range for Current Procedural Terminology (CPT) Code 36573 Updated**

Effective March 3, 2020, the age range for Current Procedural Terminology (CPT) code 36573 (Insertion of peripherally inserted central venous catheter (PICC), without subcutaneous port or pump, age 5 years or older) was corrected in the Medicaid Management Information System (MMIS) to reflect age 5 years and older. Claims for CPT code 36573 that denied with edit code 4714 (Age restriction on procedure billing rule) because the age restriction for code 36573 in MMIS was 0 to 4 years will be automatically reprocessed. The impacted claims had dates of service on or after January 1, 2019, through March 3, 2020. A future web announcement will notify providers when the claims will be reprocessed.
