## Clarification of Nevada Medicaid and Nevada Check Up Preventive Health Services

### **Nevada Medicaid Preventive Health Services**

---

Preventive Health Services is a benefit for children enrolled in Nevada Medicaid. The goal of this program is to keep children healthy through regular checkups.

Preventive Health Services include (but are not limited to):

- EPSDT screening, including vision, dental and hearing screens;
- Immunizations;
- Lead testing and other laboratory tests.

### **Nevada Check Up Preventive Health Services**

---

Preventive Health Services is a benefit for children enrolled in Nevada Check Up. The goal of this program is to keep children healthy through regular checkups. Some problems start before a child looks or feels sick. As the child's health care provider, you can find and treat these problems early, before they lead to a serious problem.

Preventive Health Services include (but are not limited to):

- Well baby/Well child exams by the child's doctor\*;
- Shots (immunizations) to keep the child healthy;
- Lead testing and other laboratory tests;
- Annual eye exam (CPT codes 92002, 92004, 92012, 92014).

\*NOTE: EPSDT screens (for Nevada Medicaid recipients) and Well baby/Well child screens (for Nevada Check Up recipients) are basically one and the same and are billed using the same codes with the same reimbursement. Because Nevada Check Up can no longer reimburse for any treatments outside of the state plan (as EPSDT allows), their screenings cannot be called "EPSDT" and thus the term Well baby/Well child is used.
