Web Announcement 233

Clinical Claim Editor Implementation Now Scheduled for First Quarter 2009

In the first quarter of 2009, the clinical claim editor will begin reviewing and adjudicating Nevada Medicaid/Nevada Check Up claims for professional and outpatient services in conjunction with the Medicaid Management Information System (MMIS). Previous communications reported a December 2008 implementation.

The claims payment system enhancement will ensure nationally recognized billing guidelines are followed and claims are processed consistently and quickly.

Reminder: If you use a billing service, please inform them of this upcoming system enhancement.
