**Nevada Medicaid Web Announcement 3492**

## **Attention All Providers: Change of Ownership Submission Reminder**

Nevada Medicaid would like to remind Electronic Verification System (EVS) users that you are not able to make ownership changes on a revalidation or change/update application. Any change to ownership information will require a Change of Ownership (CHOW) submission. A CHOW must be submitted as a new Initial Enrollment application using the Online Provider Enrollment (OPE) tool. The EVS no longer allows changes to be made in the Ownership section, such as the removal of a previous owner.

For more information, please visit the [Provider Enrollment](#) page.
