Nevada Medicaid Web Announcement 3547

Attention Provider Type 93 (Substance Use Treatment):

Substance Use Treatment/Outpatient Behavioral Health Authorization Request (Form FA-11D) Updated

Attention all providers who utilize the Substance Use Treatment/Outpatient Behavioral Health Authorization Request (form FA-11D) to request prior authorization (PA) for services: Form FA-11D has been updated and replaced on the Nevada Medicaid website on the [Providers Forms](#) webpage. Please note the form now requires the requestor to provide a release date from state custody, an admission date, and a discharge date, and to indicate from where the recipient came and how they arrived at the facility.

Providers are requested to discontinue use of the previous version of the form and use the updated form immediately.

Through February 28, 2025, the PA will be pended back to the provider if a previous version of the form is submitted. The provider will have five days to resubmit the PA request using the new form. On and after **March 1, 2025**, the request will be denied if the new form is not used.

Nevada Medicaid prior authorization forms will accept electronic signatures using a tool that allows for electronic signatures (i.e., Adobe Sign® or DocuSign®) to be applied to the document and includes the necessary information. If a provider chooses to use electronic signatures, that provider is responsible for the technical support of the signature tool being utilized.

Providers are always accountable for the validity of all signatures (wet or electronic) that appear on prior authorization forms.
