Nevada Medicaid Web Announcement 3917

Attention Providers Submitting Prior Authorizations for Physician Administered Drugs: GatewayPA Rendering Provider Selection Update

Nevada Medicaid is issuing this communication to provide guidance for providers submitting prior authorization requests for physician-administered drugs through GatewayPA.com.

When submitting a prior authorization request on GatewayPA.com, please pay close attention to the selection of the ordering practitioner on the designated screen.

- If the practitioner listed will also administer the medication and appear on the claim as the Rendering Provider, no additional action is required. To avoid claim issues or delays, ensure that the Rendering Provider indicated on the prior authorization matches exactly with the Rendering Provider submitted on the claim.
- If a Facility or Group will be listed as the Rendering Provider on the claim, you must select “Yes” to the question: “Will an alternative servicing provider be utilized for this service request...” located at the bottom of the screen.
