Nevada Medicaid Web Announcement 3941

Attention All Providers: Clinical Records Requests

Nevada Medicaid (NVHA) External Quality Review Organization (EQRO), Health Services Advisory Group (HSAG), is conducting NV 2025 Performance Measures Calculations. As part of the study, Managed Care Entities (MCEs) are required to provide clinical records documentation for a specified sample of Medicaid recipients.

This study is a required activity. Nevada Medicaid asks that all providers comply with the requests received from the MCEs within the time frames specified. Providers are required to promptly furnish the requested records at no cost, as is required in the Provider Participation Agreement signed with Nevada Medicaid.
