Announcement 455

## **Urgent EDI Announcement: 999 Responses on Version 5010 Transactions**

Some files submitted in the Accredited Standards Committee (ASC) X12 Version 5010 format from the January 1, 2012, implementation through March 2, 2012, did not receive a 999 response to indicate if the file was accepted, rejected or partially accepted. Most of the affected files had generated a particularly large number of errors.

The issue affected only the 999 response; it did not affect the processing or payment of claims that were accepted.

Effective March 3, 2012, a system change was implemented to generate 999 responses for all 5010 files received regardless of the number of errors on the inbound file, unless an Acknowledgement (TA1) response is generated first.

Missing 999s cannot be recreated and posted.
