Announcement 530

## Updated Version of Clinical Claim Editor

The Division of Health Care Financing and Policy (DHCFP) and HP Enterprise Services (HPES) will incorporate an updated version of the Clinical Claim Editor into the Medicaid Management Information System (MMIS). Please monitor this website for the implementation date. The Clinical Claim Editor criteria used to audit professional and outpatient services claims will be updated to include the National Correct Coding Initiative (NCCI) Medically Unlikely Edits (MUE). Claims received on or after the implementation date will be subject to MUE.

MUE are units-of-service edits for practitioners, ambulatory surgical centers, outpatient hospital services and durable medical equipment. This component defines for each HCPCS/CPT code the number of units of service that is unlikely to be correct; for example, claims for excision of more than one appendix or more than one hysterectomy.

Please monitor this website for additional information regarding the implementation of MUE in the Clinical Claim Editor.

More information about the NCCI mandate can be found on the Centers for Medicare & Medicaid Services (CMS) website located at: <http://www.medicaid.gov/Medicaid-CHIP-Program-Information/By-Topics/Data-and-Systems/National-Correct-Coding-Initiative.html>.
