Announcement 862

## **Billing Instructions for Claims that Cover Services that Roll Over to the Next Calendar Year**

Claims for services rendered in two different years must be split billed so that the services rendered during each year are reported on a separate claim form. As an example, if services were rendered from December 2014 through January 2015, the December 2014 services would be billed on one claim form and the January 2015 services would be billed on a separate claim form. Providers who may need to split bill their claims include all provider types who submit a UB Claim Form. Providers required to bill on a UB Claim Form will also need to bill services meeting this criteria as an interim claim.

Claims submitted with services rendered across multiple years will be denied with edit code 0124 and will need to be corrected and resubmitted within the timely filing guidelines.

**\*Please disregard these instructions. It is no longer necessary to split bill claims that cover services that roll over to the next calendar year.**
